

Why Partner With Us

Tromtech's highly specialized facility and skilled technicians & engineers function as your outsourced EDM department, giving your company added capability in serving customers.

You receive a confidential and seamless partnership without the cost and complexity of starting up your own EDM department.

Burr-Free and Stress-Free Products With Thickness Down to .002"

Tromtech is your perfect wire & sinker EDM partner. Although our name never appears on any of the components we create, our reputation is built into each one of them.

Creating micro holes, slots, and shapes in surgical titanium, and building components for manned space flight are every day events at Tromtech. With this heavy involvement in the medical and aerospace fields, we know that lives are at risk when our products are used.

We also know the importance of deadlines. As Florida's largest sinker EDM job shop, we provide consistent on-time deliveries at competitive prices.

According To Our Standards This Paper is Way Too Thick
