Hello,

Tromtech currently partners with small to Fortune 500 sized manufacturers across the country to provide them with electrical discharge machining (EDM) services on their manufactured parts, and we would love to offer the same partnership to you.

This partnership is both *seamless* and *confidential*; Tromtech will discreetly act as your company's outsourced EDM department, and your company can promote wire & sinker EDM capability when advertising or bidding on jobs.

Whether you are making titanium bone screws, surgical tools, aerospace engine parts, spacecraft components, die/molds, or any other part that requires EDM, our technicians and engineers have likely worked on something similar before.

In terms of capacity, Tromtech is proudly Florida's largest EDM job shop: we routinely handle multiple 10,000+ part orders for multiple medical manufacturing customers, all while maintaining a consistent, on-time delivery schedule for each and every one of them.

If you are curious about a partnership with Tromtech, I would greatly appreciate you contacting us at **(954) 941-6986** to discuss, or simply send your drawings or CAD files to **support@tromtech.com** or fax to **(954) 941-7034** for a quick, no-obligation quote.

The Tromtech team looks forward to working with you on your next EDM project.

Have a Great Day,

Sascha Dastgerdi, P.E.
Owner/Quality Manager
